Apt 2146
Atlanta GA, 30318

770.367.7575
me@matthewtrask.net

Open Source PHP Developer who loves designing around the domain. I prefer to test code with PHPUnit rather than pushing to server and testing in the browser. I love solving new challenges and pushing myself to greater heights.

Tandum / Developer

May 2016 - PRESENT, Nashville (Remote)

Helped maintain PHP platform using pure PHP with minimal libraries and packages. We added new features are clients request as well as fixed any regressions that occurred. We used PHPUnit and Travis CI to maintain code quality.

Insight Global / Developer/DevOps

Sept 2015 - May 2016, Atlanta

Helped maintain legacy system, as well as initial team member to start on version 2.0 of application. Used SOLID Principles, unit testing, CI and other techniques to ensure code quality. We routinely maintained 100% code coverage.

Cresca Group / Developer/Mentor

Nov 2014 - Sept 2015, LOCATION

Helped mentor interns with PHP development, maintained a custom Customer Tracking System which managed international shipping and deliveries. Helped maintain two of the forward facing ecommerce sites as well.

AtlantaPHP - Organizer

Dec 2015 - Present

Help run meetings, get slides together, all around cheerleader for the PHP community in Atlanta

Talks
